WHAT WE DO

Merlin Plastics is a processor of post-consumer and post-industrial plastics. Merlin processes PE film scrap (printed and non-printed), rigid plastics such as post-consumer blow molding high density polyethylene (e.g. milk jug containers) and polypropylene, as well as PET (e.g. soft drink containers) and some industrial scrap from commodity resin to engineering grade.

Our Mission:

To provide environmentally sound, economically efficient and socially responsible recycling options for discarded packaging.

Internal use only

RECYCLING IS OUR BUSINESS

- From curbside collection & recycling depots
- To our sortation facility, largest on the West Coast
- To the processing of plastic containers into recycled polymer that meet or exceed the market demand
